Morgan Sindall BeMo joint venture appointed to London Underground framework

A joint venture between Morgan Sindall and BeMo Tunnelling has been awarded a place on London Underground's 'Future Stations' Civils and Tunnelling Works framework. The eight-year framework is anticipated to be worth £350 million.

The successful joint venture was awarded a place on all three procurement lots – Lot 1 (Civils), Lot 2 (Tunnelling) and Lot 3 (Civils and Tunnelling).

The framework is part of London Underground's plans to upgrade its stations – including Camden, Elephant and Castle and Paddington. Work packages will include the construction of new station entrances, ticket halls and platforms including associated tunnelling and shaft works.

"I am delighted that we have been appointed to this prestigious framework," says Friedrich Neureiter, chief executive of BeMo Tunnelling GmbH. "Our joint venture has a strong working relationship having already worked together on a number of complex projects in London and we are looking forward to deploying this expertise on this framework."

Notes to Editors

Morgan Sindall Construction & Infrastructure Ltd

Morgan Sindall is a UK construction and infrastructure business with a network of local offices. The company works for private and public sector customers on projects and frameworks from £50,000 to over £1 billion. Activities range from small works and repair and maintenance, to the design and delivery of complex construction and engineering projects where it is able to provide specialist design, tunnelling, utilities, building, civil engineering and mechanical and electrical services. The company operates across the commercial, defence, education, energy, healthcare, industrial, leisure, retail, transport and water markets. Morgan Sindall is part of Morgan Sindall Group plc, a leading UK construction and regeneration group with revenue of c£2.4 billion and which operates through six divisions of Construction & Infrastructure, Fit Out, Property Services, Partnership Housing, Urban Regeneration and Investments.

BeMo Tunnelling GmbH

BeMo Tunnelling is an Austrian company specialised in the construction and refurbishment of all kinds of civil engineering structures. The highly qualified and committed team, extensive and excellent references and know-how make it an internationally renowned leader in its field. The company is well-known for its broad scope of technical competence and innovative solutions for the design and delivery of complex and challenging tunnelling projects. Tunnelling, the company's core competence, has been systematically developed since the company was founded more than 50 years ago. Building upon its core business, the range of services has since been expanded to include the fields of civil and industrial construction, ground engineering, structural maintenance and mining. BeMo Tunnelling has thus evolved towards becoming a full-range supplier of construction solutions. BeMo Tunnelling is part of the Czech construction group Metrostav and is the group's leading company for the markets Austria, Germany, Great Britain, USA and Canada.
